

- Painter, sculptor and photographer who experimented with electronic light, and music co-ordination with his artworks.
- Graduate of California College of Arts and Crafts.
- One man show at Batman – “He is both a sensitive artist and a fine scientist. The combination is unusual and so are the results. His electronic painting produces sensitive and beautiful images which are constantly changing and never repeated; his electronic music touches parts of us seldom reached by traditional sounds. Some of his sculpture is electronically controlled. His drawings and oils are sensitive, yet bold and powerful. ...Bill Risdon portrays the beauty of our scientific age and its people”. M. Agron Invitation to Attend Exhibition at Batman.
- Was a very talented and versatile painter in all mediums and died tragically in his early 20’s.
- Was the technical support for the Batman Gallery in the recording of poetry and audio/visual effects.
